

SENIOR PROGRAMMER

Agriserve, Inc., the nation's fastest growing provider of crop insurance, has an immediate full time opening for a Senior Programmer.

This position is responsible for (1) handling day-to-day programming requests from corporate and field employees; (2) providing system support as needed; (3) consulting with staff to determine business requirements, functional requirements, and input/output requirements; (4) analyzing, defining, and documenting system requirements for data, workflow, logical processes, interfaces with other systems, auditing and reporting requirements and production configuration; (5) providing technical consulting and responding to error reports, problems, or questions; (6) analyzing code for potentially untested logic, error-prone assumptions, misunderstood requirements, problem resolution, and performance optimizations; (7) analyzing, installing, and testing commercial software for internal use; and (8) writing and maintaining operational procedures and trouble-shooting procedures.

Candidates should have: (1) a Bachelor's degree in Computer Science (or equivalent degree); (2) 2-3 years of programming experience with: Microsoft SQL Server or Oracle, Visual Basic 6, HTML, ASP, .NET, and XML; (3) excellent communication and organization skills.

Agriserve is located in Findlay, Illinois, and offers a competitive salary, benefits, and retirement plan, and features a unique work environment.

Agriserve, Inc. is an Equal Opportunity Employer.
