

.NET Business Application Developer (VB or C#)

ARMtech, Inc. is seeking a talented individual to join the software development team in our well-established, rapidly expanding business located in Lubbock, Texas. The team is responsible for new development and system support for our industry-leading product. The individual will join our team of experts in full lifecycle development activities, including designing, coding, testing and debugging software programs. Bachelor's degree in C.S., Engineering, Math, or MIS, and at least 3 years experience with object oriented .NET programming (VB or C#) and relational databases (Oracle or SQL Server) required. The candidate will take a lead role in establishing .NET practices, architecture and new product development. ARMtech offers competitive salary and benefits with opportunities for growth. Initial applications are invited through email only: jobs@arnt.com
